

# MIDDLESEX COUNTY PUBLIC HEALTH DEPARTMENT

**2008**  
**Middlesex County**  
**Directory of Children's Medical Services**

*David A. Papi, Director-Health Officer*

*Ronald G. Rios, Freeholder  
Chairman Public Health*

# PREFACE

As Freeholder Chairman of the Public Health and Education Committee, I am pleased to announce the fourth edition of the “*Directory of Children’s Medical Services*.” The Middlesex County Board of Chosen Freeholders has taken the position that no child in Middlesex County should be denied access to medical care.

Middlesex County has a long tradition of providing quality health care services for its residents and this “*Directory of Children’s Medical Services*” provides a listing of over 150 available medical services. This directory is intended to serve as a guide to help make eligible residents aware of these services and the best ways to access and take advantage of them.

Our goal remains to ensure that all children of Middlesex County have access to comprehensive, complete, high quality health coverage, regardless of family circumstances. I would like to commend the individuals, agencies, and departments mentioned in this document for their commitment in providing these services to the residents of this County.

A handwritten signature in black ink, appearing to read "Ronald G. Rios". The signature is fluid and cursive, with a large initial 'R' and 'G'.

Ronald G. Rios  
Freeholder Chairman  
Public Health and Education Committee

## *School Health Services*

Rules are provided by the New Jersey Department of Education to the district boards of education for the development of policies and procedures to ensure the health and safety of students and personnel within the school setting.

Each district board of education establishes policies and procedures regarding the responsibilities of health personnel for students in the following areas: \*

- 1) Care of injured or ill pupils.
- 2) Establishment of standard policies and procedures for surveillance and reporting of communicable diseases.
- 3) Notification of parents or guardians of children that need further immediate medical care.
- 4) Arrangement of appropriate transportation for immediate medical care.
- 5) Surveillance of sanitary operation and maintenance of school buildings and grounds.
- 6) Supervision of pupil safety in the school district.

\*District boards of education, medical and other staff shall comply with the rules and regulations of the Local and County Boards of Health and the State Department of Health, where applicable.

Every school district is required to have a physician to conduct physical examinations and provide appropriate direction for the duties of medical staff. School districts are also required to have at least one school nurse. Under the direction of the physician and the school administration the duties of the school nurse shall include, but not be limited to:

- 1) Assisting with physical exams and reviewing health history and immunization status.
- 2) Providing screenings including scoliosis, hearing, height, weight and vision.
- 3) Maintaining student health records.
- 4) Providing surveillance, recommendations, and follow-up for communicable disease.
- 5) Educating staff on communicable disease and other current health concerns.
- 6) Notifying parents of any identified significant health findings or screening results that require further medical follow-up.
- 7) Testing for tuberculosis as specified by the State Department of Health.

Consult your local board of education to verify the services available in your municipality.
